# Customer Profile & Churn Overview

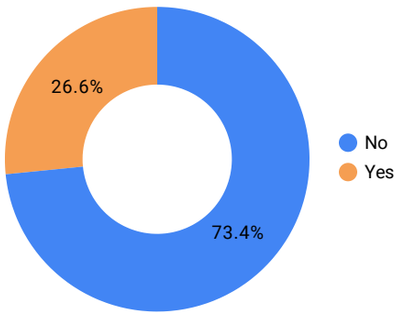

Understanding which customer segments are most likely to churn

SambungHome
HOME INTERNET · PHONE

Contract | InternetService | PaymentMethod

| Total Customer | Churn Customer | Churn Rate | Avg Tenure (months) |
|---|---|---|---|
| 7,032 | 1,869 | 26.58% | 32.42 |

## Churned vs Stayed

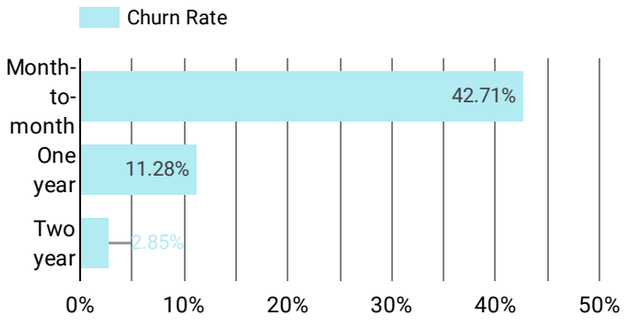

## Churn Rate by Tenure Group

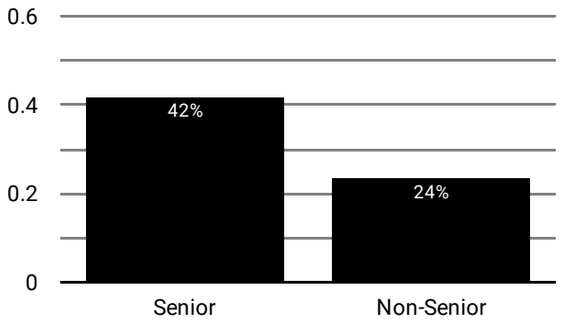

| | TenureGroup | Customers | Churned | Churn Rate |
|---|---|---|---|---|
| 1. | 0–6 bln | 1,470 | 784 | 53.33% |
| 2. | 25–48 bln | 1,594 | 325 | 20.39% |
| 3. | 13–24 bln | 1,024 | 294 | 28.71% |
| 4. | 7–12 bln | 705 | 253 | 35.89% |
| 5. | 49–72 bln | 2,239 | 213 | 9.51% |

1 - 5 / 5

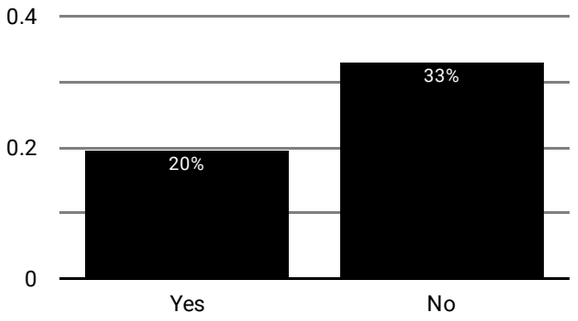

## Churn Rate by Contract Type

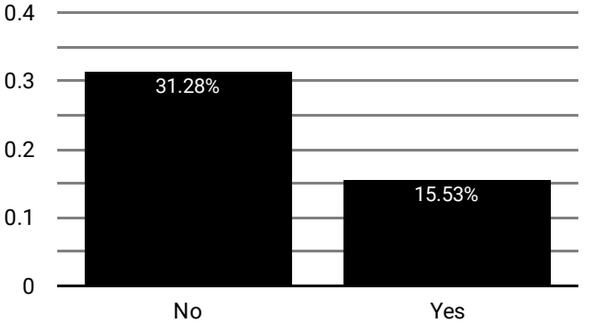

## Churn Rate by Senior Citizen (%)

## Churn Rate by Partner (%)

## Churn Rate by Dependents (%)

## Insights:

- Customers on Month-to-Month contracts exhibit the highest churn rate (~43%), indicating low commitment levels.
- Customers within their first 6 months show the highest churn rate (>50%), making early retention initiatives critical.
- Senior citizens and customers without partners or dependents churn more, but the link is weak (Cramér's V ≤ 0.16), so demographics are not used for targeting

# Root Cause Analysis

Understanding Why Customer Churn

SambungHome
HOME INTERNET · PHONE

Overall Churn Rate

26.6%

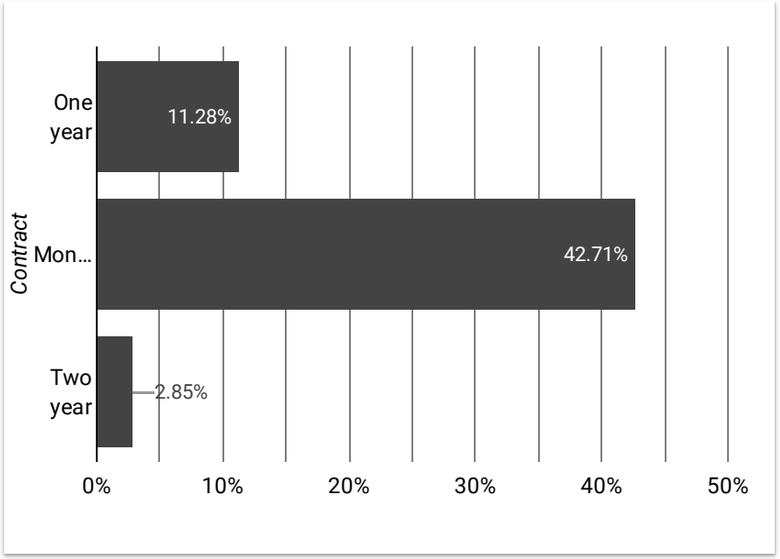

New M2M Churn Rate

55.20%

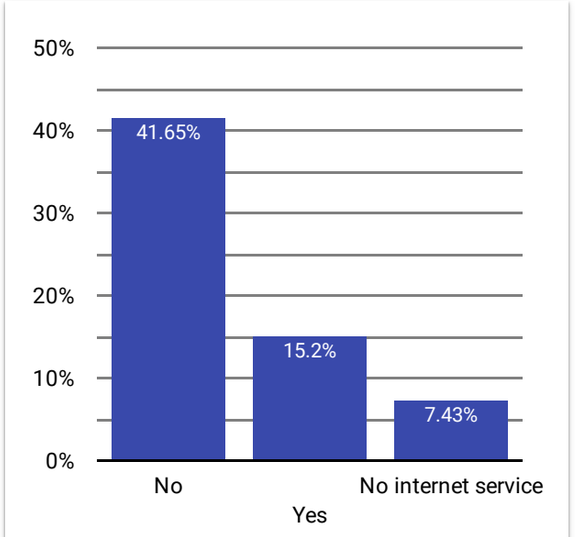

E-check (M2M) Churn Rate

53.73%

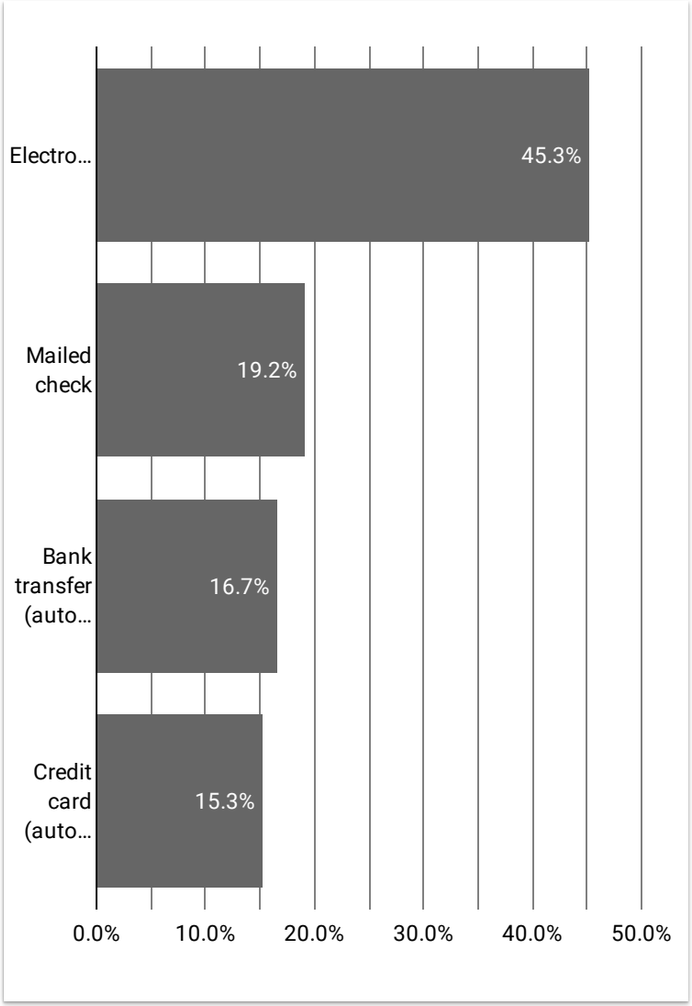

## Churn Rate by Contract Type

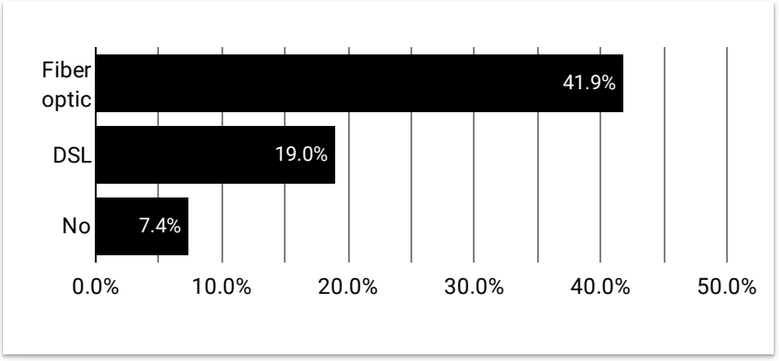

## Churn Rate by Tech Support

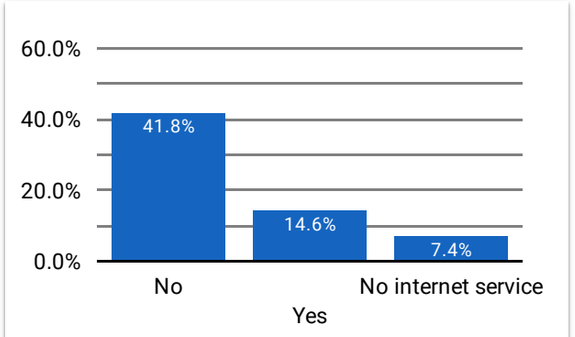

## Churn Rate by Payment Method

## Churn Rate by Internet Service

## Churn Rate by Online Security

## Insights:

- Month-to-month customers have the highest churn.
- Electronic Check users churn the most.
- Fiber Optic customers have higher churn.
- Customers without Online Security and Tech Support are at greater risk.

Within month-to-month contracts, e-check users still churn 53.7% vs ~33% for auto-pay, so payment method matters beyond contract.
